➤ What is this product?

Type: The Fund is a sub-fund of the GCM Grosvenor Alternative Funds ICAV, an umbrella type Irish collective asset management vehicle with variable capital and segregated liability between sub-funds registered with the Central Bank of Ireland ("CBI") on April 18, 2017 pursuant to Part 2 of the Irish Collective Asset-Management Vehicles Act, 2015.

Term: No fixed term.

Objectives: The Fund's aim is to generate a superior absolute and risk-adjusted rate of return with low performance volatility and low correlation with global equity and fixed-income markets, over a full market cycle; and to preserve capital during challenging market environments. The Investment Manager (GCM Grosvenor LP) seeks to achieve these investment objectives by allocating the Fund's assets to GCM Grosvenor Select Master Fund (the "Master Fund"), a sub-fund of GCM Grosvenor Alternative Funds Master ICAV. In turn, the Investment Manager will allocate the Master Fund's assets into funds or accounts managed by a diverse group of investment managers that employ a wide range of "alternative" investment strategies.

Intended retail investor: This product is intended for investors who are financially sophisticated and prepared to take on levels of risk that may jeopardise their original capital in order to get a higher potential return; and who plan to stay invested for at least 5 years. It is designed to form part of a portfolio of investments. Investors must (a) Receive an appraisal from an EU credit institution, a MiFID firm or a UCITS management company that the investor has the appropriate expertise, experience and knowledge to adequately understand the investment in the ICAV; or (b) certify that they are an informed investor by providing the following: (i) confirmation (in writing) that the investor has such knowledge of and experience in financial and business matters as would enable the investor to properly evaluate the merits and risks of the prospective investment; or (ii) confirmation (in writing) that the investor's business involves, whether for its own account or the account of others, the management, acquisition or disposal of property of the same kind as the property of the ICAV. Investors must also certify in writing to the ICAV that they meet the minimum criteria specified above and that they are aware of the risk involved in the proposed investment and of the fact that inherent in such investment is the potential to lose all of the sum invested.

Depository: The Fund's assets are held through its Depository, which is Mitsubishi UFJ Investor Services & Banking Luxembourg S.A., Dublin Branch.

Distribution type: The product is accumulating.

➤ What are the risks and what could I get in return?

Risk indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Investment performance information

The main factors likely to affect future returns to investors will be the performance of the underlying hedge funds included within the portfolio and the investment and portfolio management skills of the managers of those funds.

What could affect my return positively? Conditions that would be conducive to higher returns include financial markets that exhibit a dispersion of returns among various financial assets, affording greater opportunities for active managers, advancing markets where asset valuations reflect their underlying fundamentals, and declining markets where investment strategies have an inverse correlation to market returns.

What could affect my return negatively? Conditions likely to generate lower returns or investment losses include markets exhibiting tighter dispersion of financial asset returns, limiting opportunities for outperformance, declining markets where asset prices are untethered from underlying valuation fundamentals or where investment strategies are correlated to market returns.

The Investment Manager seeks to ensure that the investment strategy, the liquidity profile and the redemption policy of a Fund are consistent. The underlying funds that comprise the Fund's portfolio generally provide liquidity at regular intervals regardless of market conditions. In certain more extreme adverse market conditions, such funds may employ mechanisms that may constrain liquidity. In such circumstances, the Fund may avail of certain protective measures when it faces liquidity constraints or other market disruption events. These include the power to create side pockets.

➤ What happens if Carne Global Fund Managers (Ireland) Limited is unable to pay out?

The assets and liabilities of the Fund are segregated from those of the PRIIP Manufacturer. The assets of the Fund are held in safekeeping by the Depositary. In the event of the insolvency of the PRIIP Manufacturer, the Fund's assets in the safekeeping of the Depositary will not be affected. In the event of the insolvency of the Depositary, you may suffer financial loss. There is no compensation or guarantee scheme in place which may offset, all or any of, your loss.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level. Poor market conditions are unlikely to impact the Fund's capacity to pay you.

Be aware of currency risk. You will receive payments in a currency other than your local currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the Fund's Prospectus available at secure.gcmlp.com.

This product does not include any protection from future market performance so you could lose some or all of your investment.

➤ What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest GBP 10,000. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

| Investment GBP 10,000 Scenarios | If you cash in after 1 year | If you cash in after 3 years | If you cash in after 5 years |
|------------------------------------|-----------------------------|------------------------------|------------------------------|
| Total costs | GBP 586 | GBP 1,962 | GBP 3,761 |
| Impact on return (RIY) per year | 5.86% | 5.86% | 5.86% |

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

| This table shows the impact on return per year | | | |
|--|-----------------------------|-------|---|
| One-off costs | Entry costs | 0.00% | The impact of the costs you pay when entering your investment. |
| | Exit costs | 0.00% | The impact of the costs of exiting your investment when it matures. |
| Ongoing costs | Portfolio transaction costs | 0.02% | The impact of the costs of us buying and selling underlying investments for the product. |
| | Other ongoing costs | 5.27% | The impact of the costs that we take each year for managing your investments and the costs associated with running the Company. |
