.NET Software Engineer

Department: **IT – Software Development**

Reports to: **Vice President**

Location: **Chicago**

Contact: **Human Resources (itcareers@gcmlp.com)**

SUMMARY

The Software Engineer will join the Information Technology group in a dynamic and growing Alternative Investments firm with a strong technology focus. Software Engineers play a critical role in continuing to grow modern development practices and application architecture, leverage cloud base technology, and own the execution of both Greenfield projects and projects extending the capabilities of our Investment systems.

The function is responsible for designing and developing assigned technical components working with the lead or architecture member to create necessary views and other changes to the application under development. The Software Engineer is also responsible for understanding testing, participating in the broader levels of test planning and, on an as needed basis, testing and doing support activities.

The ideal candidate should enjoy working in optimized development processes environment with automation and continuous delivery practices and utilize cloud hosted infrastructure for deployment.

RESPONSIBILITIES

The individual will be involved in the following critical activities:

- Work side by side with development team members to ensure a consistent technical landscape aligned to technical architecture vision.
- Collaborate with team architects and team members to ensure that all technology initiatives are implemented within the existing or planned framework for each project.
- Provide assistance and technical guidance to Business Analysts, Software Engineers, QA Testers and others in diagnosing and resolving defects identified during testing phases.
- Continue to evaluate our technology platform against industry trends.

The individual in this position should have experience working in the financial industry. The ideal experience and critical competencies for the role include the following:

- Bachelor's Degree in Computer Science, Business or equivalent field.
- 5+ years of experience demonstrating strong understanding of object oriented design and development principles.
- 3+ years' experience with Microsoft.Net, some experience with C# required.
- Experience with PaaS tools such as Azure App Service or AWS Lambda.
- Prior experience with Continuous Integration tools such as Jenkins, TeamCity, TFS, Go etc. are a plus.
- Solid understanding of Microsoft SQL, noSQL solutions (Mongo / RavenDB / etc) and other high powered data platforms is a plus.

(GCM Grosvenor reserves the right to add to, delete, change or modify the essential duties and requirements at any time. Other functions may be assigned to the position at GCM Grosvenor's discretion.)

If interested and qualified for this position, please notify Human Resources.

EQUAL OPPORTUNITY EMPLOYER M/F/D/V

- Demonstrated experience with automated unit and acceptance level testing. Experience working in a TDD environment a strong plus.
- Working knowledge and practice working in Agile development environment with strong engineering principles (XP, SCRUM etc.).
- Experience with publish/subscription models, enterprise services bus or other similar SOA type framework and architectures a strong plus.
- Experience and/or certifications as a secure programmer is a strong plus.
- Experience in financial services and/or investment management, a strong plus.
- Ability to adapt within a rapidly changing environment.
- Attention to detail and concern for quality and accuracy of final product.
- Demonstrated team player, self-starter, and independent thinker.
- Outstanding decision making and problem solving skills.

In terms of cultural fit, the successful candidate will be self-motivated and energized by working amongst a group of thoughtful, smart, fast-paced and successful colleagues. He or she will enjoy being a part of an organization focused on excellence and will be a naturally collaborative individual who enjoys interacting with individuals at all levels. Additionally, he or she will be a strong team player with a proactive approach and the ability to take initiative with discretion and judgment.

Interested candidates should submit a letter of interest along with a resume to itcareers@gcmlp.com. Please reference “.NET Software Engineer #101377” in the subject line of the email.
