Senior Cloud Engineer

Department: IT – Infrastructure	Reports to: Vice President
Location: Chicago	Contact: Human Resources (itcareers@gcmlp.com)

SUMMARY

The Senior Cloud Engineer is responsible for the overall management and support of the Firm's network infrastructure. The ideal candidate has: experience supporting medium to large networks; data center management; cloud infrastructure management; worked with various networking tools and protocols; a good understanding of network security; and a desire to stay current with new technology solutions.

RESPONSIBILITIES

The individual will be involved in the following critical activities:

- Amazon Web Services (AWS) expertise (e.g., EC2, account access, security groups).
- Maintain and monitor cloud infrastructure (e.g., AWS, MS Azure, Office 365).
- Configuration in AWS (e.g., Sophos web filtering, VPC backup and Mgmt., KMS).
- Manage and support Linux systems and Windows systems.
- Maintain and build scripts to manage the cloud infrastructure and server instances.
- Conduct short-term and long-term network architecture planning to meet current and expanding business requirements.
- Troubleshoot router and switch connectivity.
- Provide top level network support within defined SLAs.
- Work with the Information Security and Software Development departments to design an operating environment and data flow that is secure.
- Develop testing and implementation plans for projects with multiple moving parts.
- Actively participate in troubleshooting and RCA for security and INF events.
- Consistently provide high quality work in a deadline driven environment.
- Accountable for accomplishing tasks both independently and collaboratively.

GENERAL EDUCATION, SKILLS OR EXPERIENCE REQUIREMENTS

The individual in this position should have experience working in the financial industry. The ideal experience and critical competencies for the role include the following:

- BA/BS Degree in Engineering, Computer Science or a related field. Industry certifications preferred.
- 7+ years of network or network management experience in a technical networking role, including – but not limited to – design, implementation, disaster recovery, network security architecture and engineering.
- Proven ability to provide automation solutions using PowerShell, Python and JSON.
- Must have strong prior scripting experience.
- Must have Cloud experience with AWS; experience with MS Azure, Office 365, and/or Force.com is a plus.

(GCM Grosvenor reserves the right to add to, delete, change or modify the essential duties and requirements at any time. Other functions may be assigned to the position at GCM Grosvenor's discretion.)

If interested and qualified for this position, please notify Human Resources.

EQUAL OPPORTUNITY EMPLOYER M/F/D/V

- Platform and OS experience: Linux, UNIX, Server 2003, Server 2008, Server 2012, Windows XP, Windows 7, Windows 8, iOS.
- Prior experience with Dell and Cisco hardware.
- Strong experience with WAN/LAN technologies, legacy protocols, and networking techniques.
- Experience with various networking components such as: Cisco equipment, NetApp, WebSense, Juniper, ACLs, Firewalls, VPN, MPLS, SSL, TLS, SMTP, DNS, DHCP.
- Experience with remote access technology such as: Citrix, OWA, Juniper (SSL VPN), Cisco VPN, etc.
- Proven analytical and problem solving abilities.
- Capable of multitasking and prioritizing in a fast-paced environment, effectively and efficiently.
- Experience working in a team-oriented, collaborative environment.
- Strong documentation skills.
- Outstanding client service skills and ability to present ideas in user-friendly manner.
- Highly self-motivated.
- Strong attention to detail.

In terms of cultural fit, the successful candidate will be self-motivated and energized by working amongst a group of thoughtful, smart, fast-paced and successful colleagues. He or she will enjoy being a part of an organization focused on excellence and will be a naturally collaborative individual who enjoys interacting with individuals at all levels. Additionally, he or she will be a strong team player with a proactive approach and the ability to take initiative with discretion and judgment.

Interested candidates should submit a letter of interest along with a resume to itcareers@gcmlp.com. Please reference “**Sr. Cloud Engineer #101246**” in the subject line of the email.
